DevOps Engineer | Platform Engineering | AI Infrastructure

PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of hands-on experience designing, deploying, and operating scalable **CI/CD pipelines**, Kubernetes workloads, and cloud infrastructure across AWS and Azure in **Prod and non-Prod environments**. Expert in **Jenkins** deployment pipelines, **Terraform IaC**, EKS troubleshooting, and centralized observability using **ELK, Grafana, OpenSearch, and Dynatrace**. Proficient across core AWS services (**VPC/Subnets, RDS, ElastiCache, MSK, Amazon MQ, S3, EKS**), NGINX, and network/firewall configuration. Founder of Storiv — a production multi-tenant B2B backup SaaS. NVIDIA-Certified in AI Infrastructure & Operations and Generative AI LLMs. CKA and Terraform Associate candidate. AWS Certified Solutions Architect.

CORE COMPETENCIES

CI/CD & Deployment: Jenkins (Prod & Non-Prod) · GitHub Actions · CircleCI · Docker · ECR · Automated Rollback · Release Pipelines

Container Orchestration: Kubernetes (EKS, AKS) · RBAC · Helm · Kustomize · HPA · DaemonSets · Pod Security Standards · Network Policies

Infrastructure as Code: Terraform · ARM Templates · Remote State (S3+DynamoDB) · Drift Detection · Versioned Module Libraries

AWS Services: EC2 · S3 · VPC/Subnets · RDS · ElastiCache · MSK (Kafka) · Amazon MQ · EKS · IAM · Lambda · CloudTrail · Security Hub

Monitoring & Observability: ELK Stack · OpenSearch (AWS) · Grafana · Loki · Dynatrace · Site24x7 · CloudWatch · Azure Monitor · Incident Runbooks

Networking & Security: NGINX · AWS Firewalls (SGs/NACLs) · Active Directory · Zero-Trust · CIS Benchmarks · Trivy SAST · SOC2 Controls

Policy-as-Code: Kyverno · OPA/Gatekeeper · Admission Controllers · Audit/Enforce Mode · Image Signing Policies

AI Infrastructure: NVIDIA GPU Workloads · LLM Pipelines · AIOps · Amazon Bedrock · DCGM · TensorRT · NeMo

Languages & Tools: Python · Go · Bash · PowerShell · YAML · SQL · Git · ArgoCD · FluxCD · NATS JetStream · Jira

EDUCATION

Diploma — Computer Systems Technician, IT/IS (CST)

Sheridan College · Brampton, ON

Jan 2023 – Jan 2025

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) — In Preparation | CNCF / KodeKloud

Expected 2026

HashiCorp Certified: Terraform Associate — In Preparation | HashiCorp

Expected 2026

NVIDIA Certified Associate: AI Infrastructure & Operations | NVIDIA

Issued May 2026 · Expires May 2028

NVIDIA Certified Associate: Generative AI LLMs | NVIDIA

Issued 2025

AWS Certified Solutions Architect – Associate (SAA-C03) | Amazon Web Services

May 2025 – May 2028

Certified Professional Ethical Hacker (C|PEH) | Mile2

Jun 2021

PROFESSIONAL EXPERIENCE

IT Operations Associate – Cloud & Platform | SME LLP | Mississauga, ON

Feb 2026 – Present

- Architect and operate multi-environment cloud infrastructure (AWS + Azure) supporting 12 internal services at 99.7% uptime across **Prod and non-Prod environments**; own **P1/P2** runbook-driven incident response with documented SLA adherence.
- Built GitOps delivery platform using **Argo CD + FluxCD**; eliminated all manual kubectl apply operations and decreased deployment-related incidents by 65% across Dev, Staging, and **Prod EKS clusters** within 6 weeks.
- Streamlined **Jenkins** and GitHub Actions **CI/CD pipelines** — Docker build → Trivy SAST → ECR push → **EKS** rolling deploy — compressing release cycle from 3.5 hours to 22 minutes (90% improvement); configured **NGINX** as reverse proxy for all Prod services.
- Deployed **ELK Stack and OpenSearch (AWS)** for centralized log aggregation; built **Grafana + Dynatrace** alerting dashboards for real-time troubleshooting of EKS deployments, Jenkins pipelines, and application layer.
- Authored 15+ **Kyverno** admission control policies (image signing, resource limits, namespace isolation); policy gates block 100% non-compliant container images before reaching production.
- Operationalized cloud security remediation via Python + **AWS Lambda** targeting CIS Benchmark violations (S3 public access, stale IAM, unencrypted EBS); slashed open security findings by 78% in 45 days.

- Provisioned hybrid Azure infrastructure (IaaS/PaaS) using **Terraform** and ARM templates across Dev/Test/**Prod**; eliminated 88% of manual provisioning steps, cutting environment setup time from 3 days to 4 hours.
- Hardened **Azure Active Directory** (RBAC, conditional access, identity governance) across 95 user accounts and 200+ cloud resources; zero unauthorized access incidents over 17 months.
- Deployed **Azure Monitor** and Log Analytics alerting pipelines for server, network, and app-layer events; lowered MTTD from 48 to 11 minutes (77%) while maintaining **P1/P2** SLA compliance.
- Managed network infrastructure including VLANs, **firewall rules**, and switch configuration; administered **Active Directory** domain services and enforced GPO policies across the organization.
- Automated OS-level patching, **Hyper-V VM** provisioning, and Intune/Autopilot enrollment workflows via PowerShell and Bash, reducing technician effort by 60%.

KEY PROJECTS

Storiv — Multi-Tenant B2B Backup SaaS (storiv.com): Founder & architect. Production multi-tenant backup platform for servers, Microsoft Entra, and M365 data. Namespace-per-tenant EKS isolation, schema-per-tenant PostgreSQL, Go/Gin microservices (API Gateway, Backup Controller CRD/Operator, Scheduler, Agent Manager), Terraform IaC across AWS + Azure + GCP, GitOps via ArgoCD + Kyverno policies, NATS JetStream messaging, NGINX ingress, and full GitHub Actions CI/CD across Prod/non-Prod.

PulseQ — Event-Driven Distributed System (GCP): Multi-tenant autoscaling message queue SaaS on GKE; KEDA-driven horizontal scaling, Pub/Sub, Cloud SQL, Firebase Auth, Workload Identity, Terraform IaC, and three-stage GitHub Actions pipeline (build → test → Prod/non-Prod deploy).

Azure MLOps 3-Tier Architecture: Production MLOps platform on AKS — 6 Terraform modules, multi-environment GitHub Actions CI/CD, NGINX ingress, Prometheus/Grafana/Loki observability stack, Key Vault secrets management, and full network isolation with firewall rules.

AWS EKS 3-Tier Deployment (TaskFlow): Highly available 3-tier app on EKS with Jenkins CI/CD pipelines (build → Trivy SAST → ECR push → rolling deploy), ArgoCD GitOps, Terraform IaC, NGINX ingress, and automated rollback across Prod and non-Prod.

Flask Asset Tracker: Containerized inventory management system; Jenkins CI/CD, Docker image builds, NGINX reverse proxy, MySQL, and OS automation scripts. github.com/kalpsoni18
